

DRAFT v1 - for review

Keel & Crate Movers crew policies 2026 - circulated July 14, 2026 - not approved

1. Clocking in and out

Crews clock in at the yard on the tablet by the dispatch window and clock out there at the end of the day. Travel time from the yard to the first job and back from the last job is paid time.

2. Phone use while driving

Drivers may not hold or use a phone while the truck is moving. Set navigation before leaving the yard or the job; the crew member riding in the cab handles calls and texts.

3. Overtime

Overtime must be approved by the dispatcher before a crew works more than 90 minutes past the scheduled end of a job. Call dispatch as soon as it is clear the job will run over.

4. Long-distance per diem

Crew members on overnight long-distance jobs receive a per diem of \$55 for each night away from home, paid with the next payroll. The company books and pays for lodging directly.

5. Tips

Cash and card tips are pooled for each job and split among the crew members who worked that job in proportion to the hours each of them worked on it.

6. Using your own vehicle

If dispatch asks you to drive your own vehicle to a job site or to pick up supplies, the company reimburses \$0.67 per mile. Log the trip on the mileage sheet the same week.

7. Damage to customer property

Report any damage to a customer's property or belongings to the dispatcher within two hours of finishing the job, with photos.

8. Uniforms

Company shirts must be worn on every job. Each crew member is issued three shirts a year and one jacket every two years.

9. Safety boots

Steel- or composite-toe boots are required on every job. The company reimburses up to \$150 per calendar year with a receipt.
